Amazing Stories

Hollywood's Psychological War

Against Whites, Christians, Germans & Arabs.

By Michael A. Hoffman II [The author is a former reporter for the Associated Press, ABC News, WGVA and WEOSL.

A 20th century riddle: When is hate propaganda not hateful? Answer: When it promotes hatred of Whites, Christians, Germans and Palestinians.

More than forty-five years after World War Two and old hatreds are still being dug up by the media. The "bury the hatchet" sentiment is nowhere in sight today. Nazism is too lucrative. Put a swastika on the cover of a book or video and it will sell. Establishment "anti-Nazis" have been raking in the shekels for years in this way. Independent media critics have warned against the "Hollywood Nazi" phenomenon created by the corporate media itself.

Disaffected White youths with little factual knowledge of the actual historical record of the chivalry and civilization of Germany and the American South, get their behavioral cues from Hollywood's TV make-believe and proceed to imitate grotesquely sensationalized Tinseltown versions of how Germans and White Southerners supposedly acted in the past.

The multi-billion dollar "Holocaust Survivor" industry reanimates the cadavers of Hitler and Company on TV almost nightly and presents them in the most hyped and pornographic manner possible.

When impressionable young people immersed in this orgy of "Hollywood Nazism" start to imitate what they see on television, the Establishment screams itself hoarse about "the rise of Neo-Nazism!" But who planted the distorted images in the kids' heads in the first place?

The One World, "New Age" order has intimidated our society to such an extent that it is widely regarded as a dangerous thought crime even to cite the fact that anti-White television programs are

directed by a media cartel which dishonors our White ancestors and tars any contemporary support for White separatism as monstrous evil.

During the entire 12 years of Hitler's dictatorship, exactly three anti-Jewish movies were produced. In our time, three anti-German, anti-White, anti-Christian or anti-Arab films are sometimes in production every week!

Blockbuster Video corporation owns a national chain of videocassette rental stores. In a single month this video conglomerate acquired five new Hollywood videos for its stores that were hate propaganda films defaming White people: *War Party*, *Heart of Dixie*, *River of Death*, *Trapper County War* and *Forced March*. [Blockbuster Video Catalog, March 1990].

TV films such as these constitute a form of psychological warfare against Whites by repeatedly lying about our ancestors and creating stereotypes of them as monsters. Through this process feelings of self-hate and low self-esteem are instilled in White people. Meanwhile Hollywood is scrupulously careful to portray Jewish, negro and Asian ancestors, traditions, heritage and events with the utmost sympathy and sensitivity.

Former Secretary of State Henry Kissinger told a private Hollywood gathering of top media executives that television coverage of Israeli atrocities must be banned (*L.A. Times*, March 30, 1988). Former NY City Mayor Edward I. Koch advocated censorship of TV news footage in order to protect Israeli army war criminals from exposure (*L.A. Times*, March 16, 1988, p. 9).

According to a survey of Israelis conducted by the Israeli-Diaspora

Institute, 63 percent of Jews in Israel believe that TV reports or pictures depicting Israeli army atrocities against Palestinians "should be banned because they harm Israel's image" [*Canadian Jewish News*, March 15, 1990, p. 8].

Don't hold your breath waiting to see any docudramas on TV about the thousands of Palestinian women and children who were murdered by the Israeli air force in August of 1982, when clearly marked schools and hospitals in Beirut were deliberately bombed by Israeli pilots. Don't expect to see any films on TV about Zionist "JDL" bombings in America, or about "religious fanatics" like Rabbi Yitzhak Ginzburg who preach that the blood of a non-Jew is not equal to the blood of a Jew.

Viewers will search in vain for movies and TV docudramas portraying negro rapists, robbers and murderers who deliberately target White people for attack. These negro attacks comprise the majority of the violent crime in America, but if you rely on television for your "reality," all you'll see is ugly Whites victimizing saintly Black people.

Journalist Patrick J. Buchanan: "As we look at our crime capitals--Washington, Detroit, Phoenix, Miami, New York, L.A.--how many are victimized by Klan terror? Of 20,000 murders reported each year, how many are the work of neo-Nazis? One, two, five? Recently, the national press reported that one in four young Black males was locked up, or on probation or parole. Violent crime in America is primarily the business of minorities..." (*The Wanderer* newspaper, March 22 1990, p 5).

The non-reproducing birth-rates, catastrophic abortion rates, miscegenation and fratricide afflicting Whites are ominous signs of drastic decline, symptoms of a profound self-hate which is being artificially instilled in us through the perpetual dissemination of lies and negative stereotyping about us on television.

Moreover, it truly is "amazing" that so "hateful" a race of people as Whites, upholding so "depraved" a religion as Christianity, ever managed to create a nation as great as America. How were we able to form a Republic that was the envy of the world in the days before we were "blessed" with the "saintly" intercession of anti-Christ Pharisees in our publishing and communications systems; before we were "freed" from our "wickedness" by Martin Luther King?

How alien Hollywood's twisted, malevolent mirror has been allowed to become our most important image of ourselves, is indeed one of the more "Amazing Stories" in the history of psychological warfare. As we internalize the slime Hollywood's scriptwriters pour upon us, we become mentally colonized people, prone to self-destructive behavior, sitting passively while our nation is taken from us, too cowed by media opprobrium to defend our heritage. There is an old saying, "Let me write a nation's stories and I care not who writes its laws."

Everyone of the following films is riddled with lies and in many cases the entire script is based totally on lies, even though very often the movies are presented to gullible TV-watchers as "true-life."

Bearing false witness against a single individual is regarded as a grievous crime under the Common Law. What magnitude of crime is it to bear false witness against an entire nation of people, perpetually, on television, in books, magazines, newspapers, and at the movies and theaters, as the System's media have done?
